PROFESSIONAL SUMMARY

Frontend Developer proficient in **React.js, TypeScript, and modern JavaScript frameworks**, with expertise in **web scraping, performance optimization, and user experience design**. Skilled in developing scalable solutions and transforming unstructured data into structured formats for analysis.

SKILLS

- **Frontend:** React.js, HTML & CSS
- **Backend:** Django, REST APIs
- **Languages:** JavaScript, Java (Certified), Python
- **Tools:** Git, Mixpanel, TailwindCSS, Mantine UI, SQL

WORK EXPERIENCE

Gearup Studios

Frontend Developer

2024 - Present

- Developed a **responsive web application** using **React.js** and **TailwindCSS**, improving user engagement.
- Worked with a team of four developers to seamlessly integrate RESTful APIs, facilitating efficient data communication between the frontend and backend.
- Utilized **Mixpanel** for user behavior analytics, enabling data-driven decision-making and feature improvements.
- Implemented **optimized state management** using **Redux & React Query**, improving application performance and reducing unnecessary re-renders.

PROJECTS

Accounting Website

Developed a user-friendly accounting software for tracking income/expenses with document uploads using **React, TypeScript, Tailwind CSS**, and designed with **HTML, CSS**, and **JavaScript**.

Driver's Job Platform

Developed the website using **React & Mantine UI**, implementing a responsive interface, driver task invitation system, and mobile-first optimization for better user experience.

Photographic Website

Developed a full-featured website using **React & TypeScript**, integrating **AWS facial recognition** for automated photo identification and WhatsApp sharing for seamless access. Ensured modern **responsive design** for optimal user experience.

E-commerce Application

Refurbished the app by modifying screens and implementing new features using **React Native**, improving user experience and functionality with enhanced product search and checkout processes.

web-Scraping

Developed automated data extraction solutions using Python (BeautifulSoup, Scrapy) and transformed unstructured web data into structured formats for analysis.

EDUCATION

Sri Sairam Engineering College

Master of Business Administration - 7.01

2021 - 2023
