PERSONAL PROJECTS

Weather App

Html, CSS, Js

Description

– It integrates the Open Weather Map API to retrieve real-time weather information for the provided city, displaying details like temperature, humidity, and wind speed. The user interface allows users to input the city name and initiate the weather check by clicking the search button. In case of an invalid city name or error from the API.

Organic Spices E-commerce Website

Html, CSS, Bootstrap, Js

Description

– I developed an e-commerce platform for an organic spice company, designed to offer a seamless browsing and purchasing experience for customers exploring a wide range of organic spice products.

Interactive Code Editor with Live Preview

Html, CSS, Js

Description

– This project is an interactive web-based code editor that allows users to write and execute HTML, CSS and JavaScript code in real-time. The interface is divided into three sections for HTML, CSS, and JavaScript code input, with a live preview pane that updates automatically as the user types. This project is ideal for learning and experimenting with web development concepts.

One-to-One Video Call App

React

Description

– Engineered a one-to-one video call application using React and integrated it with ZEGOCLOUD's real-time communication services. The app delivers a seamless video calling experience by harnessing ZEGOCLOUD's robust and scalable infrastructure. It optimizes video and audio quality while minimizing latency, ensuring smooth and reliable communication for users.
