- **Programming Languages:** Java, C#, SQL, HTML, CSS, JavaScript
- **Backend Technologies:** Java SE, C#.NET, MVC Architecture
- **Frontend Technologies:** HTML5, CSS3, JavaScript, Angular (Introductory)
- **Database Management:** MySQL, MS SQL Server (joins, constraints)
- **Development Tools & Frameworks:** J2EE, ASP.NET, ADO.NET

Certifications

- Java Development (Core Java, J2EE)
- Microsoft .NET Framework (C#.NET, ADO.NET, ASP.NET MVC)
- Web Development Foundations (HTML, CSS, JavaScript, Angular - Introductory)

Projects

E-Crime Management System :

Technologies: .NET Framework

Developed a centralized web application for reporting and managing cybercrimes. The system streamlines the tracking, investigation, and reporting of cybercrime cases, improving efficiency and collaboration among cybersecurity teams.

Email Management System with CRUD Functionality:

Technologies: Java, MySQL, HTML, CSS, JavaScript

Built a CRUD-based email management system that enables users to perform Create, Read, Update, and Delete operations on emails. The backend is implemented in Java with MySQL used for data storage, while the frontend is built using HTML, CSS, and JavaScript.
