Objective

Enthusiastic and dedicated recent graduate with a solid foundation in full-stack development, skilled in front-end and back-end technologies. Eager to contribute to a forward-thinking team, leverage my coding skills, and grow as a full-stack developer by building efficient and user-friendly applications.

Education

Easa college of engineering and technology

Artificial intelligence and data science 7/10 CGPA

2021-2025

A Skills

- HTML
- CSS
- JAVA SCRIPT
- C program
- C++(BASIC)
- PYTHON
- Node. Is
- React
- My sql

Project

BRAIN TUMOR SEGMENTATION AND DEFECTION

frame work : monai model :3 D model

Pizza bill Generator app java

Developed a Java-based application to automate pizza billing for small restaurants or users.

Created an intuitive UI using Java Swing to allow users to select pizza size, type, and toppings. Implemented real-time price calculation with tax and discount support.

Designed modular classes following OOP principles to handle user inputs, pricing logic, and receipt generation.

Bus reservation system java

Developed a Java-based bus reservation system to manage bookings, cancellations, and seat availability. Designed the back-end using Java and MySQL for database management.

Implemented features such as user authentication, real-time seat tracking, and payment integration.

Personal Portfolio Website

Responsive design to work on mobile and desktop devices.

Use CSS animations for smooth transitions.

Optional: Add a contact form with JavaScript validation.
