SUMMARY

Enthusiastic and detail-oriented Front-End Web Developer with hands-on experience in HTML, CSS, JavaScript, and React. Proven ability to build and enhance responsive web pages through academic projects. Adept at translating design concepts into functional, user-friendly interfaces while adhering to best practices in web development. Additionally skilled in backend development with Java, Spring Boot, and SQL, enabling the creation of full-stack applications. Seeking to leverage my skills in both front-end and back-end technologies to contribute to innovative and high-quality web solutions.

- Full-Stack Java Developer Course
  Login 360, Velachery
  Completed: 2024

PROJECTS

Web Application using HTML and CSS

- **Objective :** Develop a static website dedicated to gaming, designed to provide information and services related to the gaming industry. This project will serve as an introductory exercise in web development, focusing on fundamental skills in HTML and CSS.

- **Responsive Design :** Ensure the site is usable on various devices by using media queries and flexible layouts.

Online Education Website Using React JS

- **Objective :** Develop a dynamic and interactive educational platform where users can access courses, view lessons, and track progress. This project will help you understand React's component-based architecture and state management.

Features and Components:

- **User Authentication :** Allow users to register, log in, and manage their profiles.
- **Course Listings :** Display available courses with details such as title, instructor, and description. Users can filter and search courses.
- **Course Details :** Show detailed information about a course, including lesson plans, videos, and resources.
- **Lesson Viewing :** Implement a video player or content viewer for lessons. Integrate features such as bookmarking and progress tracking.
- **Responsiveness :** Ensure the website is functional and looks good on various devices.
