EDUCATION

2018 - 2022
JEPPIAAR INSTITUE OF TECHNOLOGY, ANNA UNIVERSITY

- Bachelor of Technology - IT
- CGPA: 7.99

SKILLS

- Express js
- Nodejs
- Postgresql
- Mysql
- Web socket
- Github
- RabbitMQ
- JWT

LANGUAGES

- **English** : Professional Fluency
- **Tamil** : Native Speaker

HOBBIES

- Coding
- Competitive Coding & Problem Solving
- Gaming
- Fitness & Sports

PROFILE SUMMARY

Proficient NodeJS (Typescript) Developer with 2 years of experience in optimizing and deploying high-performance applications for e-commerce and financial services industries. Collaborative team player with expertise in database designing and Restful API optimization. Skilled in building scalable backend applications using Node.js, Express, and MongoDB.

WORK EXPERIENCE

Piccosoft® Software Labs India Private Limited 2023 - 2025
Junior Software Developer

- Skilled in backend development with Node.js, Express, and MongoDB. Experienced in RESTful APIs, third-party integrations, and performance optimization. Optimized image resize API with AWS Lambda, reducing response time. Generated dynamic PDFs and Excel files using HTML templates. Proficient in async programming and database management.

PROJECTS

E-Commerce Application

- Developed a robust e-commerce platform enabling seamless product browsing, order management, and secure payments. My responsibility in this project was to design and implement the event module, ensuring smooth handling of promotions, sales events, and user interactions.

School Management system

- Worked on school management and CMS SAAS application from development to production. Developed and maintained Restful Api's based on module requirements.
- Proficiency in PostgreSQL, MySQL databases and used stored procedure, trigger functions efficiently and creating new modules
- Implemented push notification system for this application using Firebase admin sdk and RabbitMQ server.

Work management

- In this project I worked in CRUD Api to the checklist module which manages employee's daily routines,The Broadcasts module which is used to send notifications to all employees, To-Do List module that gives space for employees to maintain their To-Do List and fixing issues and maintaining website stability.

Food based Application

- This application focuses on showcasing how various foods are processed. My responsibility in this project was to develop the event module, ensuring seamless event creation and management.
