PROFILE

Experienced React Developer with expertise in building dynamic web applications using Next.js 15, Tailwind CSS, and Material UI. Proficient in creating responsive, user-friendly interfaces and writing clean, maintainable code. Passionate about delivering high-quality solutions that enhance user experiences and meet client needs

WORK EXPERIENCE

LAABAMONE BUSINESS SOLUTIONS PVT LTD | 1 YEAR

- Developed and managed a robust booking platform for a U.S. client, streamlining the scheduling of services and reservation management.
- Designed and implemented a disaster communication website and a GST filing website, ensuring reliable functionality and user satisfaction.
- Built intuitive admin panels to handle tasks such as creating and managing service listings, viewing and monitoring subscription plans.
- Integrated AWS Lambda for a scalable serverless architecture, enabling seamless execution of complex back-end operations, and utilized GraphQL for efficient data fetching and API management.
- Designed responsive and user-centric front-end interfaces with React.js, Next.js, and Material-UI, ensuring optimal performance and a seamless user experience across all devices.
- Leveraged Next.js context to effectively manage global state, enhancing scalability and maintainability.
- Implemented secure and efficient payment processing using Stripe, improving the overall user experience for booking and subscription services.

Fabevy Technologies- Intern

- Designed responsive web pages with HTML, CSS, JavaScript, and Bootstrap for optimal user experience. Converted static templates todynamic interfaces, built reusable React.js components, and usedReact-Router, Redux, and Context API for efficient state management and navigation
