Education

Shanmuga Industries Arts & Science College| 2019 - 2022
Bachelor of Commerce – Computer Application – 77 %

Project Details

E-commerce web applications B2C
Developed a full-featured B2C e-commerce platform using Next.js, enabling users to browse products, manage their accounts, and make purchases securely. The key features are User Registration and Authentication, Product Catalog, Shopping Cart, Order Management, Seller and Customer management.

E-commerce web applications B2B
Developed a robust B2B e-commerce platform designed to streamline the buying and selling processes between businesses. The platform facilitates bulk ordering, personalized pricing, and efficient account management tailored to meet the complex needs of business transactions

Media Platform for Empowering Startup Founders and Business Leaders
I recently developed a media platform dedicated to publishing high-quality content about startups and entrepreneurial journeys. The platform provides insightful reports aimed at informing, educating, and empowering startup founders and business leaders. Built with Next.js and integrated with GraphQL APIs, Website is optimized for SEO using Open Graph (OG) meta tags. I also utilized content management systems and analytics tools to enhance user experience and engagement, delivering relevant articles and resources to our audience.

Miscellaneous

Problem Solving, Deployment, Debugging, Design

Platforms:

Windows, Linux - Ubuntu & mac iOS

Declaration

Hereby, I declared that all the details furnished above are true to the best of my knowledge.
