WORK EXPERIENCE

Full Stack Developer [Full-Time]   *Nov 2024 – Current*
Jasmine Global Process Solutions   Remote, IN
— Spearheaded the development of a dynamic CRM platform using Next.js and MongoDB, ensuring seamless data synchronization and user interactions.
— Integrated advanced role-based access control to secure sensitive CRM data and enhance multi-tiered user management.
— Automated data pipelines for lead management, enabling real-time updates and reducing manual intervention by 30

Junior NodeJS Developer [Full-Time]   *May 2024 – Nov*
Riolabz   Remote, IN
— Developed RESTful APIs using NestJS, ensuring efficient communication between the front-end and back-end.
— Implemented AWS services such as S3 for storage and Lambda for serverless functions, enhancing the scalability and reliability of applications.
— Utilized Swagger for API documentation, streamlining the development process and improving collaboration between front-end and back-end teams.

MERN Stack Developer [PART-TIME]   *Nov 2022 – Nov 2023*
NIGHATECH   Remote, IN
— Worked with web3.js to integrate the NextJS Framework for handling the ETH Blockchain Smart Contract for ERC20 Token Generation.
— Built RESTful APIs that served data to the ReactJS front-end to handle the user input and store the data in MongoDB.
— Developed the RESTful API using NodeJS server and ExpressJS Framework to serve the data into the database.
