PROFILE SUMMARY

Career Summary:I am a dedicated web developer with hands-on experience in building and hosting websites using HTML, CSS, JavaScript, jQuery, BootStrap, and SQL. During my internship, I developed a website using BizplusTools and deployed it on BizplusCloud. I also have knowledge of Python and have worked on a hostel management website, showcasing my problem-solving and development skills.Key Achievements:Successfully developed and deployed a functional website during my internship.Built a hostel management website with a well-structured database and user-friendly interface.Quickly adapt to new technologies and environments, making me a strong team player. Career Goals:I aim to leverage my web development experience to transition into cloud engineering, focusing on scalable and efficient cloud-based solutions. I am particularly interested in roles that allow me to work on cloud platforms, automation, and AI-driven applications.
