## PROJECTS

### RUMOR SOURCE IDENTIFICATION PROJECT

Rumor is roaring through the various social media platforms. During this case classification of any news, post, story, journal into fake or real one has become a crucial them as fake and true. Identifying rumor sources in social networks plays a critical role in limiting the damage caused by them through the timely quarantine of the sources. However, the temporal variation in the topology of social networks and the ongoing dynamic processes challenge our traditional source identification techniques that are considered in static networks.
